📍 Ghaziabad, India

Software Engineer with expertise in Java, specialising in creating REST APIs with SpringBoot and MySQL, utilising JUnit for extensive testing. Experience working with ReactJS for web-development and Flutter for mobile app development. Skilled in writing optimised code and leveraging knowledge of Data Structures and Algorithms to solve complex problems.

WORK EXPERIENCE

Salescode.Ai | Jan 2022- Present
Software Engineer (Full stack)

- Led development on various projects for multinational clients like ITC and J&J, ranging from app development to backend systems; utilized Java, JavaScript , ReactJs, and SpringBoot.
- Developed REST APIs along with integration with partners like PAYTM, SBI, AXIS, FINAGG in SpringBoot. Junit testing with good code coverage, optimized code for better performance, resulting in a 25% reduction in load time.
- Actively participated in Agile methodologies, contributing to sprint planning and daily stand-ups.
- Collaborated with product managers and stakeholders to define project scope, prioritize tasks, and manage project timelines.
- Utilised tools like postman for Api testing , github for version control and jenkins for continuous integration and deployment, ensuring seamless software delivery.
- Prepared api documentation with swagger and conducted knwledge transfer sessions.
